LESS THAN 3 MINUTES.

DURABLE

THE INDUSTRY STANDARD FOR
FASTENER PACKAGING

FRIENDLY

OPERATOR PROMPTING FOR
MAXIMUM PRODUCTION

The Delta Model LSW16 SpeedWeigher uses industry tested, rugged, reliable mechanisms and electronics to automatically weigh-fill a wide variety of products. Fasteners from #8 flat washers to 3/8" x 3" bolts, the Model LSW16 will efficiently fill cartons, boxes, blister-boxes, card-backed blisters, or poly bags in a hurry. With the introduction of our new high performance collector device, the "next batch up" is being collected while the SpeedWeigher is dumping the previous batch, thereby increasing output by up to 40% over similar type systems. This totally self-contained, flexible packaging system has the versatility to handle short or long production runs quickly and easily. A Programmable Logic Control Instrument enables fast and easy setup and changeovers.

TYPICAL PRODUCTION RATES

1/4 x 20 Hex Nut
100 ct.

14 / minute*

Ring Terminal
100 ct.

12 / minute*
