OPERATOR PROMPTING FOR

The Delta Model LW16 Weigh-fill Machine uses simple, rugged, reliable mechanisms and electronics to automatically weigh-fill a wide variety of products. This "standard in the industry system" will package fasteners from #8 flat washers to 3/8" x 3" bolts, and will efficiently and accurately fill cartons, boxes, blister-boxes, card-backed blisters, or poly bags. This totally self-contained, flexible packaging system has the versatility to handle short or long production runs quickly and easily. A Programmable Logic Control Instrument enables fast and easy setup and changeovers are quick and simple.
